

# Name Conventions

- Tables and Columns:
  - All objects of database should be named with lower letters
  - All objects of database should use \_ instead of space
  - All foreigner keys have a reference to the original table in their name
  - All objects will be named in singular
  - All primary key have the name of the table and \_id
- Constraints:
  - Will use the following prefix to identify what type of constrain it is:
    - NOT NULL → nn\_
    - UNIQUE → un\_
    - PRIMARY KEY → pk\_
    - FOREIGN KEY → fk\_
    - CHECK → ck\_
  - Will use the name of the column they are restraining
